

CABLE TRAINER

For FI-3C Underground FCI

Cable Trainer

FI-3C T1

Standard magnetic cable trainer

Cable Trainer with Steel Plate

FI-3C T2

Standard magnetic cable trainer with steel plate

DESCRIPTION

The FI-3C T1 is a magnetic cable trainer to easily organize fiber optic cables inside transformer or switchgear cabinets when installing SGS underground FCIs. The FI-3C T2 includes the standard FI-3C T1 magnetic cable trainer along with a magnetic steel plate. The steel plate can be attached to fiberglass transformer or switchgear cabinets and allows for the installation of cable trainers to a non-magnetic surface.

Standard pack size of 10 and 100.
